OVH: the alternative S.M.A.R.T. cloud

Innovation for freedom

Our values

OVH group

Simple
Multi-local
Accessible
Reversible
Transparent

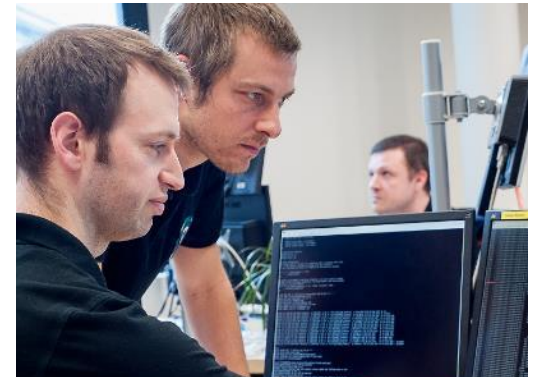

Our history

100% pure player for the cloud since 1999, with a verticalised and industrial business model

Our technology

An innovative cloud, based on open standards, APIs, open ecosystems and thriving communities

Our commitment

Secure, high-availability infrastructure, with SLAs, no lock-in, and competitive, transparent pricing

A different vision of the cloud

01

European

We are compliant with european regulations.

02

Pure Player

We do not compete with our customers.

03

Reversible

Our solutions are based on technological standards so we offer data reversibility and interoperability.

04

Transparent

We are transparent about our pricing as we are about the event of incidents affecting our services.

05

Responsible

We reduce our environmental impact by alternative ways to air conditioning.

06

Accessible

Our model involves a vertical integration of the business so that we control our entire value chain.

07

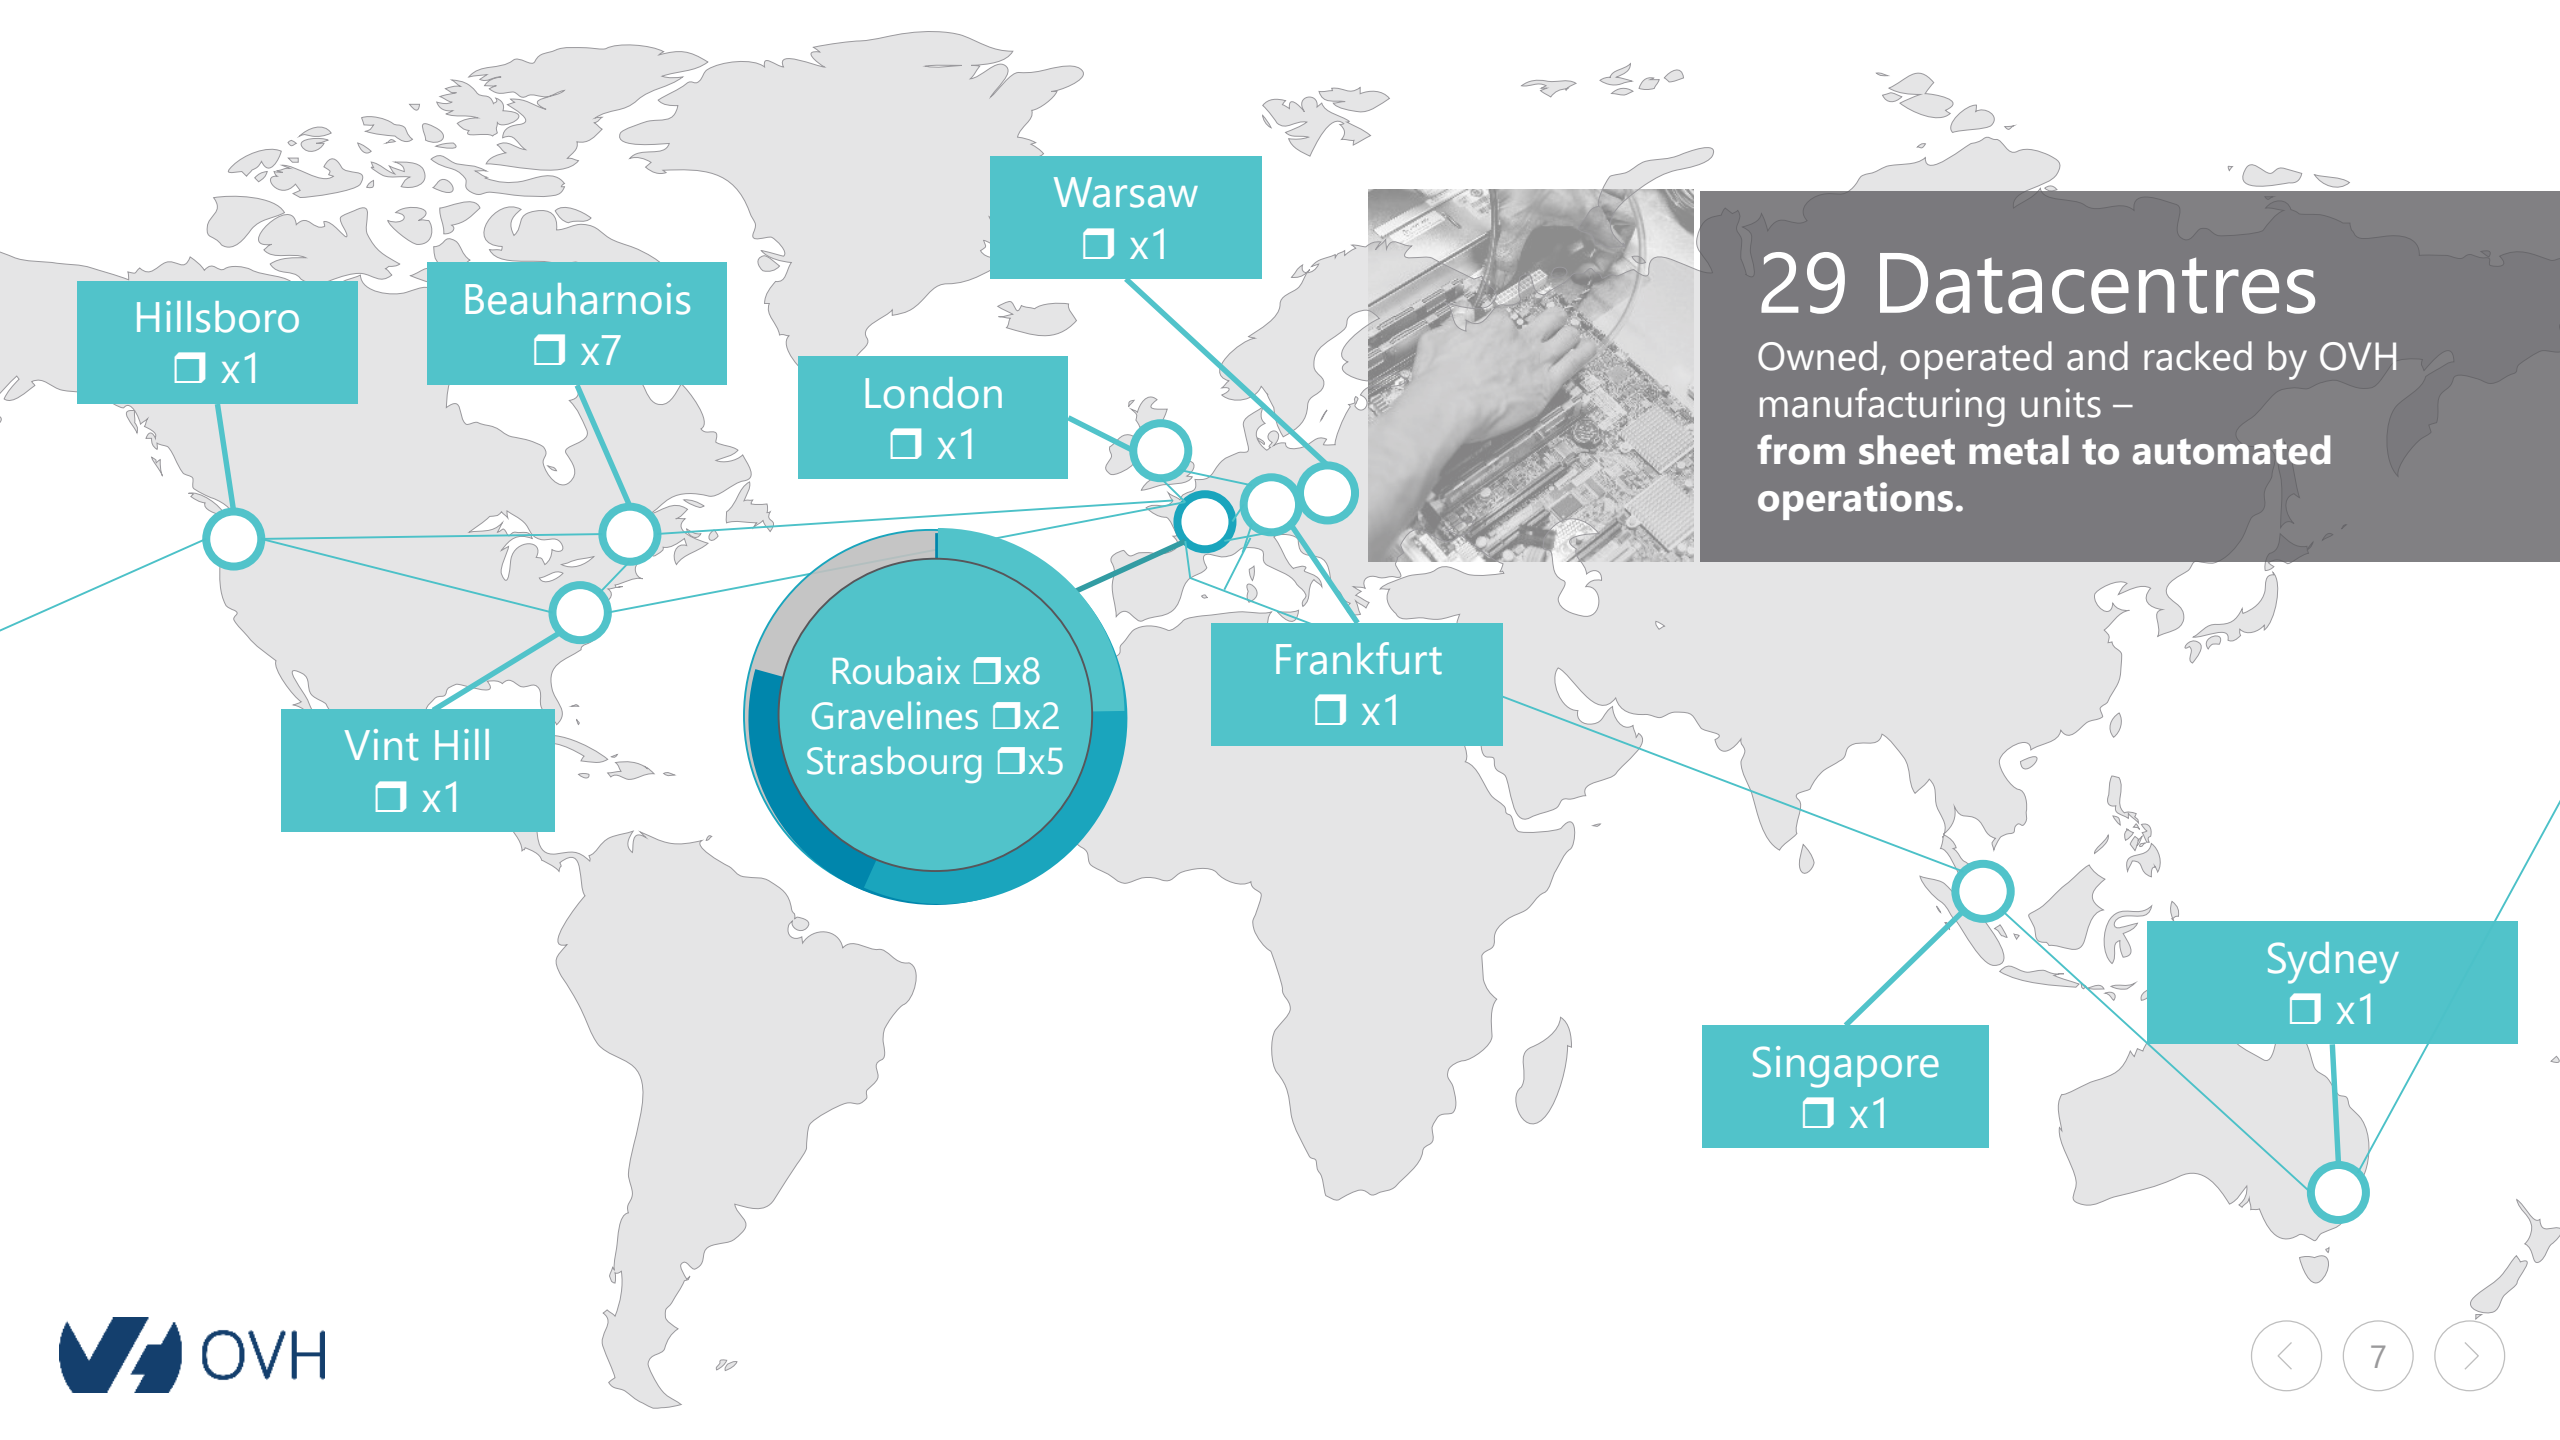

Global Network

We build, deploy and operate our own global fiber network that offers low latency and high-quality bandwidth.

08

Tailor-made services

We offer solutions to interlink our products across our regions of availability.

29 Datacentres

Owned, operated and racked by OVH manufacturing units –
from sheet metal to automated operations.
